

Guy Peretz

Product Designer, B2B SaaS, Complex Systems & AI-Native Experiences

Product Designer with 3+ years of experience designing and shipping complex B2B SaaS products across CRM, fintech, and healthcare.

Experienced in end-to-end product design, from discovery and user research through UX/UI, interaction design, prototyping, design systems, and implementation.

Currently working as the sole designer in an early-stage, AI-native SaaS environment, partnering directly with founders, Product, and Engineering to turn ambiguous problems into clear, scalable product experiences.

Experience

Product Designer · Sole Designer

Dreamhub – B2B AI-Native, Sales CRM

Apr 25– Current

- Owned the end-to-end product design process as the company’s sole designer, from discovery and user research through UX/UI, prototyping, implementation, and QA.
- Took product features from design to production using AI-assisted and agentic workflows, building working implementations, committing code, opening PRs, and iterating through Engineering code review.
- Shaped the product from stealth through launch and adoption by 30+ customers, defining and evolving its core experiences and workflows.
- Partnered directly with founders, Product, Engineering, and Data Science to identify problems, define solutions, prioritize initiatives, and ship features.
- Conducted customer interviews and design partner sessions, translating insights into product and design decisions.
- Created and maintained the platform design system, implementing and refining UI components to ensure consistency across design and production.
- Owned Dreamhub’s brand guidelines and marketing website design, creating visual assets for marketing, sales, and leadership.

Product Designer

Papaya Global – B2B Global Payroll & Payments platform

Nov 24 – Mar 25

- Designed product experiences as part of a design team, collaborating with Product and Engineering from exploration through developer handoff.
- Worked on complex product flows involving third-party integrations and early exploration of an AI Agent experience, translating technical requirements into clear user flows and interaction patterns.

Product Designer

Sive UX – Agency for complex digital products

Nov 23 – Nov 24

- Designed B2B and B2C products across web, mobile, and tablet for startups, enterprises, and public-sector organizations in healthcare and urban infrastructure.
- Worked across diverse product contexts, from data-heavy B2B platforms and operational tools to consumer apps and public digital services.
- Took products from early concepts through user research, UX/UI, prototyping, and implementation, collaborating with client stakeholders and Engineering teams.
